<sup>^</sup>Portfolio Turnover Ratio (PTR) calculated as Purchases or Sales (whichever is less) divided by Average NAV of fund, annualised since inception 28/01/15.

## The VT Castlebay UK Equity Fund

The VT Castlebay UK Equity fund is unconstrained and invests a minimum of 80% in UK listed companies with the flexibility to have a maximum of 20% in either cash, fixed interest securities or overseas equities.

### Our Aim:

Our aim is to generate a return in excess of inflation (CPI) plus 4% annually, over a rolling three year period. We seek to deliver a total return of income and capital growth by investing in high quality companies at attractive valuations for the long term.

Our investment process focuses on companies with:

- A Valuation Margin of Safety.
  - An Operational Margin of Safety.
  - Strong cash flows.
  - High returns on capital employed.
  - Good operating margins.
  - Low or no debt.
- We invest in high quality companies which have the ability to compound their returns over time for the benefit of their shareholders, an aspect often ignored by the market.
  - We invest for the long term. We do not speculate on short term share price movements.
  - We invest on a bottom up basis, only once a company has passed our investment process.
  - We invest in a conviction portfolio of between 20-30 high quality companies.
  - We levy transparent management fees which are capped & aligned to long term performance.

Our quarterly investor letter highlights any changes to our fund.

Quality Table	Castlebay Fund	Market
Return on Equity	38%	25%
Operating profit margin	22%	14%
Net debt to equity	42%	89%
Cash conversion	108%	99%
Free Cash Flow yield	3.6%	3.5%
