

David F Ridland

Manager & CIO

David co-founded Castlebay and has managed the fund since inception. Previously he managed UK equities at Ignis and Barclays. David took Modern History at the University of St Andrews, as well as the MSC in Investment Analysis at Stirling University.

Fund Attributes

Our investment process identifies companies with:

- Strong cash flows
- High returns on invested capital
- High operating margins
- Low or no debt
- An operational margin of safety
- A valuation margin of safety

Investment Risks

- Past performance is not necessarily a guide to future returns.
- The value of the investments and income derived from them may rise and fall in the future.
- A concentrated portfolio of 20-30 companies can involve higher risk and more fluctuations of capital value.
- A minimum of five years is suggested as an investment time horizon.
- There are areas of the UK market in which we will not invest such as Banks & Big Oil due to their low returns on equity capital.

Fund & Share Class information

Fund Type	UCITS (UK)
Launch Date	28 Jan 2015
Dividend Payment	Feb, May, Aug, Nov
Dividend Yield	2.5%
Initial & Exit costs	None
Dilution Levy ¹	Yes

5 Day Liquidity	90%
No. Holdings	26
Average co. founded	1942
Average Mkt Cap	£29BN

Daily dealing priced at 12 noon
¹ Dilution levy applies to large purchases (10% or more) and large redemptions, in relation to the NAV of the fund. The levy is calculated and charged by the ACD, Valu-Trac, to protect existing investors from the costs associated with large fund purchases and sales.

² Portfolio Turnover Ratio (PTR) calculated as Purchases or Sales (whichever is less) divided by Average NAV of fund, annualised since inception 28/01/15.

About Castlebay Investment Partners LLP

Castlebay Investment Partners LLP was established by David MacNeil & David Ridland in 2013. The VT Castlebay UK Equity fund was subsequently launched in January 2015. Castlebay is owned by the Partners who make business & investment decisions according to our guiding principles:

- **Transparency & alignment of best interests with our fellow shareholders**
- **Adherence to our investment philosophy & process**
- **Independence of thought to avoid the market herd**
- **Focus on costs: management fees capped & low turnover**

Investment objective:

Our fund invests a minimum of 80% in UK listed companies with the flexibility to invest up to 20% in cash, fixed interest securities or international companies. We aim to generate real returns by exceeding inflation (CPI) plus 4%, per annum, on a rolling three year basis.

Investment approach: We are **Quality Value** investors (in that order) and invest in high returning companies when they are attractively valued versus their own long term average valuations.

Our 'Quality table' highlights some key metrics we assess when we analyse a business. We believe that the underlying returns generated by companies drive share price performance over the long term. Our focus is on companies which have demonstrated an ability to generate high returns in the past, which will enable them to carry on making high returns in the future.

Quality Table	Castlebay Fund	Market
Return on Equity	39%	21%
Operating profit margin	20%	10%
Net debt to equity	52%	100%
Cash conversion	117%	106%
Free Cash Flow yield	3.8%	4.3%

Source: Bloomberg as at 28/02/21

We invest in companies with conviction and for the long term. We do not speculate on short term share price movements. We invest from our investment universe. Our universe consists of companies from the whole of the UK market and developed international markets, which have passed our quality test. Our charges are transparent. We pay the ongoing fund charges from our management fee and dealing costs are low. Investing mistakes often prove to be a source of learning and these are examined, along with our approach to investment, in our quarterly investor letters.

*Castlebay pay all ongoing fund costs from their management fee which means the Annual Management Charge is the same as the Ongoing Charges Figure (OCF). Ongoing fund charges exclude stamp duty and dealing commission. These costs are published in our final quarterly letter each year.

Why a CPI+4% benchmark?

We prefer not to follow the investing herd. Our aim of exceeding inflation (CPI) plus 4% per annum, on a rolling three year basis, frees us up to invest only in those businesses which satisfy our quality characteristics.

We will never own a company merely because it is a large constituent of an index, nor will we allocate to certain sectors so we do not deviate significantly from an index.

In fact, we do not invest in banks or big oil companies because they do not earn sufficient returns on their capital. We will often deviate from the market crowd. It is important you understand and are comfortable with that before you invest.
